 	<h2>Rome Metro Station</h2>
<p>Committer: Vodafone, ATAC</p>	<p>Services: Real time tracking of Security Guards in Rome Metro Stations</p>
<p>Squared meters: 50.000 s.mq (Lines A & B – only walkable area)</p>	<p>Beacons: 280 (Lines A & B)</p>
<p>Stations: 53</p>	
<p>Context: ATAC private police inside Rome Metro Station needs to track their police men and help them synchronize for security reasons in case of danger.</p>	<p>Description: Rome Metro Station is composed by 5 lines: A,B,C, Rome-Lido and Rome-Viterbo. The complete project will include also the yards. Today the system is fully integrated with the metro system and enabled on Line A and Line B, with other lines scheduled for 2017. The overall surface is over one million squared meters indoors on different levels and floors. The esteemed number of beacons is about 6000. The metro is always crowded and internet connection is not always available. Nextome was capable to deliver high accuracy indoor positioning even in problematic situations like crowding and no internet access.</p>
<p>Benefit: Increasing performance and response time of security agency in 53 stations</p>
